*Total payoff time = the 12-month maintenance cycle plus the months needed for the per-shade surcharge to recover the remaining software balance, based on 226 shades.

PAYMENT SCHEDULE — MONTHLY REMITTANCE

The per-shade surcharge collected each month (rate × 226 shades, shown in the "Collected / Month" column above) must be paid to Orvion.co every month, and no later than every 2 months. Orvion.co will not wait for Fortune Industrial Park to finish collecting the full remaining balance before receiving payment — whatever is collected from the shades each cycle is remitted to Orvion.co in that same monthly or 2-monthly cycle, until the full ₹85,000 is paid.

CONFIRMATION — RECOVERY TIMELINE

The "Total Payoff Time" above is purely Fortune Industrial Park's own internal timeline for recovering the remaining software cost from its tenants through the per-shade surcharge. It has no bearing on payment to Orvion.co. Once the upfront amount and the agreed per-shade surcharge are applied as scheduled, Orvion.co's payment of ₹85,000 is considered complete in full. The speed at which the park recovers this amount from its shades is the park's own internal matter — Orvion.co bears no responsibility, delay, or loss in this regard, and this timeline cannot be raised as a dispute, objection, or claim of loss against Orvion.co at any point.
